Here's how it works

The eBeam system is the revolutionary technology that turns any standard whiteboard into a digital workspace. Just attach the system to your whiteboard, connect it to your computer, insert standard dry erase markers into the electronic sleeves and launch the eBeam Software. You're ready to capture everything you write and draw on your whiteboard onto your PC - where you can save, print, or share them over the Internet in real-time. With the help of the eBeam Presenter plug-in (sold separately), you can also record your voice with your written notes and synchronize them for live or on-demand play.
